

NITTO CO., LTD.

## Management philosophy

NITTO's motto is "Building fine-quality bicycle products is our passion." All products should be safe, functional in terms of their purpose and usage, beautiful and sturdy.

NITTO strives every day to bring joy to the world of cycling.

## Company history

NITTO was founded in Tokyo, on February 11, 1923.

As the size of the company increased, it built three more plants in the metropolitan Tokyo area, and began to operate a total of four plants. In 1972, which was the 50th anniversary year of its founding, NITTO constructed another plant in Nihonmatsu City, Fukushima Prefecture, and also relocated the existing four plants.

Over the past 80 years, the company has received several awards from ministers of Japanese ministries, namely the Japanese Ministry of Commerce and Industry, the Ministry of International Trade and Industry, and the Ministry of Labor.

In 1957, NITTO received permission to affix the JIS (Japanese Industrial Standards) 5354 marking on its products. Since the current plants in Fukushima Prefecture were also JIS-certified in 2002, the company continues to be allowed to affix the JIS 5354 marking.

NITTO's handlebars, handlebar stems and seat pillars for track races are certified for use in official Japanese KEIRIN races.

In addition to its already highly acclaimed handlebars, handlebar stems and seat pillars, the company now develops other bicycle parts made of metal tubes, such as frames, carriers and various accessories at the plants in Fukushima. NITTO strives to translate the company's motto into its day-to-day management activities.
